

Viktor Lenac shipyard is oriented towards a sustainable development based on principles of the world's best practice that acknowledges technological achievements and considers specific shipbuilding rules and laws and regulations. Our development is a continual improvement process in compliance with internationally recognized environmental protection requirements.

The shipyard is seeking to raise awareness about the importance of environmental protection at all levels, including its clients and subcontractors, through active participation and management support.

The main determinants of implementation of an environmental protection policy are the following:

- Understanding and applying, and an effective response in accordance with local and

- International laws and regulations and environmental protection requirements;
- Integrating environmental protection as part of developmental strategy and using it as a basis for planning and decision making;

- Ensuring that all employees are educated and trained and conscientiously fulfil their obligations and responsibilities towards the environment, and motivated to behave in compliance with principles of environmental protection;

- Monitoring continuously impacts on the environment and minimizing or completely removing negative effects;

- Constantly supervising all shipyard's activities always aiming at using means and implementing procedures that have the least environmental impact;

- Improving environmental protection in all shipyard's activities, in particular moving towards cleaner production processes.

- Rationally utilizing natural resources, material and energy, ensuring compliance with the world's highest environmental protection standards;

- Cooperating with local authorities in an open and honest manner in order to contribute mutually to maintain the environmental values.

- Evaluating and following up on the implementation of the environmental protection policy aiming at stimulating the continuous improvement of the management system.

The company management shall provide appropriate human, financial and technical resources to ensure the implementation of the environmental protection system and shall stimulate the creation of such a work environment where principles of environmental protection are fully respected. The company management shall ensure that all suppliers and business partners are duly informed on the company's environmental protection principles and respect them.

Our commitment to permanently increase our positive environmental impact is the key to our long-term success.
